

# EVIDENCE TO PRACTICE:

Engaging the AT Research Agenda as a **RESEARCHER**

97.5%

of respondents **agreed/strongly agreed** the profession would benefit from clinician-researcher collaborations <sup>1</sup>

97.4%

of respondents **agreed/strongly agreed** the profession would benefit from researchers producing clinically relevant data <sup>1</sup>

63.1%

of respondents **agreed/strongly agreed** researcher willingness to engage with clinicians is a barrier to collaborative research <sup>1</sup>

## RESEARCHER-CLINICIAN COLLABORATIONS CAN:<sup>2</sup>

**FACILITATE  
CLINICAL  
TRANSLATIONAL  
RESEARCH**

**ANSWER  
CLINICALLY  
RELEVANT  
QUESTIONS**

**DETERMINE  
MEANINGFUL  
OUTCOME  
MEASURES TO  
COLLECT**

**PROVIDE ACCESS  
TO PATIENTS  
AT THE POINT-  
OF-CARE**

**HELP MAKE  
EXTERNAL  
FUNDING MORE  
COMPETITIVE**

**MAKE AN IMPACT BY:**

- Spending time in the clinical setting
- Utilizing study designs that are more clinically applicable
- Developing on-site champions when building a research team
- Obtaining clinician input upfront in the grant application or RFP process
- Designing studies that streamline processes to compliment the clinician
- Targeting language and terminology to the intended audience
- Presenting easily consumable information
